

FOUNDATION MAXFAC ONLINE ORIENTATION

22nd & 23rd December 2023
6:00pm to 8:30pm

It is extremely important for all trainees in Maxillofacial surgery, to be able to take care of the needs of their patients, particularly those admitted and undergoing surgeries of differing complexities.

Therefore, it is imperative that all post graduate trainees have ample understanding of the functions of the various organ systems and the disorders associated with them. Failing to optimise these patients, with various disorders of different organs and systems, before carrying out a Maxillofacial surgery, could result in life threatening complications and possibly be disastrous.

FOUNDATION MAXFAC is a course designed by the AOMSI to orient and refresh all new trainees to the speciality, to this aspect of patient management.

As a first step in this direction, an online orientation program will be held on the 22 and 23 of December 2023 from 6 pm onwards. This orientation program will be followed by offline courses at different parts of the country to discuss details of these aspects and better familiarise trainees in perioperative care of patients. The details of the consequent off line courses will be shared soon

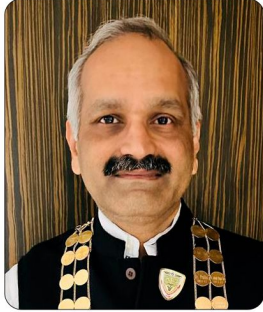

The following topics will be covered in this online program:-

Day 1 (22 Dec 2023, 6pm to 8:30pm)

1. Cardiovascular system
2. Respiratory System
3. Endocrine system (Diabetes only)
4. Hematology

Day 2 (23 Dec 2023, 6pm to 8:30pm)

1. Endocrine 2
2. Renal System
3. Central Nervous System
4. Gastrointestinal system
5. Brief introduction to the offline courses to follow

DR. BHAGAVANDAS RAI. A
President, AOMSI

DR. S GIRISH RAO
Hon. Gen Secretary, AOMSI

Dr. Krishnamurthy Bonanthaya
Chairman,
AOMSI Foundation Maxfac

Prof. Ashish Gupta
Course Director
